Course Description

The objective of this course is to enable students to develop the skills and knowledge of the acquisition process as it relates to entrepreneurial businesses. Students will be expected to apply both their academic training and prior business experience to the class. The course requirements will consist of the assigned readings, class discussions, and a final project.

The unique aspect of this class is students will receive valuable experience understanding how to value and acquire closely held businesses. A goal of this class is to provide you with the skills and tools to assess, evaluate, and consummate a business opportunity while having a meaningful and challenging learning experience.

The course requires that you master and integrate material from a number of disciplinary areas. Entrepreneurship involves the creation of value through applied business innovation, and it allows you to utilize every business skill that you have acquired. This is not a simple challenge. It is important that you prepare, attend, and participate in all classes. Much of the actual learning will take place in class. The class discussions are an important component of the learning process. Although the notes for each class will be distributed via the webCafe before each class, they will not be a complete summary of every lecture. I have found it is helpful in the learning process for students to supplement the handouts with their own in-class notes. I will email the class when the notes are posted on the webCafe. The course assignments will consist of the assigned readings, class discussions, and an acquisition analysis project, which is discussed later in this Course Description.

If you have to miss a class or are unprepared, please let me know in advance. It will be your responsibility to obtain any handouts and notes from your classmates.

The University is a community that fosters the exchange of ideas and knowledge; Penn's policy discourages confidentiality agreements. The assumption is that any work a student submits is in the public domain. Students do not have an automatic right of confidentiality on submitted coursework. However, where confidentiality does not interfere with learning, I will honor these requests, when needed, on a case-by-case basis. Students are expected to respect the intellectual property of others.

THE WHARTON SCHOOL
THE UNIVERSITY OF PENNSYLVANIA
MGMT811: Entrepreneurship Through Acquisition

All students will be expected to approach the course in a professional, business-like manner. In-class lectures and discussions will supplement the student's training in the following areas:

- Locating a business
- Evaluating a business
- Adding synergy through acquisition
- Business valuation
- Structuring business purchases
- Tax aspects of purchasing a business
- Obtaining capital

Instead of traditional case studies, this course will utilize short caselets and project-based cases. Short fact patterns or the student projects will be used to illustrate and demonstrate relevant topics. Typically the instructor or students will present an operational, tactical, or strategic challenge that is being confronted. Class members will be expected to participate in the discussions by providing suggestions, solutions, or highlighting the relevant issues.

Throughout the course, students will have the opportunity and are encouraged to make short presentations to the class on their acquisition targets.

I am available during business hours and at other times as well as via email and telephone to assist you. I encourage you to seek my advice and input.

Recommended Materials:

Two bulk packets:

Bulk Packet 1 can be purchased through Wharton Reprographics or obtained via the webCafe.

Bulk Packet 2 can only be purchased through Wharton Reprographics. This bulk packet contains the Harvard Business Review Publications.

Chalfin, Robert J.; *Selling Your IT Business: Valuation, Finding the Right Buyer, and Negotiating the Deal*. January 2006 John Wiley & Sons, Inc. ISBN 0-471-74076-4 (RJC).

Pratt, Shannon P.; Reilly Robert F.; and Schweih, Robert P.; *Valuing a Business*, 5th Edition. McGraw Hill 2007 [PRATT]. This is optional material.

Lecture notes and supplemental materials will be distributed in class and via the webCafe.

Bulk packet readings designated with an asterisk (*) are suggested, the remaining readings are optional.

Grading Policy: Term grades will be based on the following:

Class Participation	40%
Readings List	5%
Acquisition Analysis	55%

Spring 2008 Q3

Acquisition Project Description

We will spend some time in class discussing how to locate a business that may be for sale. If you are not contemplating a business acquisition, you can approach business owners about performing an independent analysis of their business. You should be candid, forthright, and professional with everyone you are in contact with for this project. The analysis should be written; however, some groups may also elect to present their analysis in class. The business should be analyzed by a group of three or five students. Students should form their own groups. The completed acquisition analysis data sheet should accompany the analysis that is submitted. Each group member is expected to work on the group's project and will receive equal credit for the work. The written acquisition analysis is due on March 7, 2008 and should comply with the project guidelines, which are contained in the following pages. If an assignment is submitted late, it will be penalized. Assignments should be submitted via the webCafe as one computer file, preferably in Word or PDF.

A business that is used as the basis for a project should be one that is reasonably within the group's means to acquire. Target businesses can include "roll-ups" of several businesses in the same or complementary industries or a business that can add synergy to an existing venture. A business' location should not limit you. Target businesses must be an existing, operating business but can be located anywhere in the world. Inappropriate target businesses include publicly held entities, real estate projects, single-location retail businesses or start-ups as well as secret or confidential businesses.

On January 30, 2008 each group should submit a two to three page summary outlining the work it has performed to date as well as the additional tasks to be completed.

Beginning with the third week of class, each group will be required to a) make a 10-to-12 minute presentation covering their search process and target business or b) to meet with me to discuss their project.

Gathering, analyzing, and reporting on a business is a time consuming process. You should begin working on this project immediately. You should not take this course if you plan on doing most of the work immediately prior to the due date.

Groups have the option of submitting a draft of their project on February 25, 2008. The purpose of this submission is for me to provide you with suggestions and comments. Since it is optional, it will not be graded.

Attached are:

1. Suggested Guidelines for Acquisition Analysis
2. Acquisition Analysis Guide for Grading
3. Acquisition Analysis Data Sheet – This should be completed and attached to your team's acquisition analysis.
4. Readings Report Description

Robert J. Chalfin

Spring 2008 Q3

Suggested Guidelines for Acquisition Analysis

The Analysis should be written in outline form and contain the following information.

- I. Executive Summary (1 Page)
- II. Overview of the business (1-2 pages)
 - A. Provide a succinct description of the business
 - B. History
 - C. Location (s)
 - D. Key employees
 - E. Customers and source of business
 - F. Competitors
 - G. Market analysis
 - H. Any other relevant information
- III. Strengths, Weaknesses, Opportunities and Threats Analysis (1-2 pages)
- IV. Summarize recent financial results of the business (1-2 pages)
 - A. Balance sheet
 - B. Income statement
 - C. Cash flow
- V. Acquisition Plan and Valuation (2-4 pages)
 - A. What is the purchase price?
 - B. Capital structure/offer.
 - C. Show valuations of comparable businesses.
 - D. Use multiple valuation methods.
 - E. How was the price determined? Include your calculations.
 - F. How will any indebtedness be liquidated? Provide a cash flow statement.
 - G. Analysis of risk.
- VI. Future changes and improvements (1-2 pages)
 - A. What do you suggest to improve the business such as:
 - Change or adjust the business model
 - Marketing plan
 - Raising capital
 - New employees
 - B. How can you expand the business?
 - C. What are new markets for the business?

This Acquisition Analysis Data Sheet and readings report should be submitted with every project.

The purpose of the class project is to provide the reader with a succinct overview of the entity that is being considered for acquisition. The page lengths are provided as guidelines, however, **the entire submission, exclusive of the Acquisition Analysis Data Sheet and readings report, should be thirteen pages or less.**
