OH: by appt. 3107 SH-DH Email: henisz@wharton.upenn.edu

Objectives:

Successful practitioners of corporate diplomacy meld art and skill in engaging external stakeholders to advance their corporate interests. They craft international coalitions of stakeholders spanning politicians, regulators, bureaucrats, analysts, investors, lawyers, reporters, consumers and activists. They influence these stakeholders' opinions, perceptions, behaviors and decisions so as to secure a favorable policy outcome, collective decision or shift in group opinion that enhances their corporation's ability to generate a profit by satisfying a market demand. This course surveys the managerial, political economic, sociological and psychological foundations of corporate diplomacy as well as 11 case study examples of successful and failed implementation in order to develop an interdisciplinary framework for the play of global influence games. The insights gained can be applied to influence team decision-making and organizational politics as well as by individuals and organizations in lobbying, marketing, sales, political campaigns and corporate, national or multilateral projections of soft power.

Outline

We will begin with an introductory module that makes the case for Corporate Diplomacy and offers an overview of best practice. We will highlight the gap between these principles and practical tools that managers can apply to design and implement corporate diplomacy making reference to the live case of sustainable palm oil and the historic experience of the electricity generation and distribution company AES's investment in an electricity distribution company in the Republic of Georgia. Next we examine the six elements of Corporate DIPLOMacy: Due diligence on the stakeholder landscape in Indonesian mining and Russian activist fund management; Integration into strategic analysis and planning in Russian oil and African mining; Process that are perceived as fair and generate Learning in the bankruptcy of a Thai conglomerate and in the operation of a Peruvian mine; Openness in reporting and communications in Romanian gold mining and Chinese environmental activism; and, finally, Mindsets in IKEA as they grapple with accusation of Indian child labor before returning to electricity distribution through private equity investor Abraaj Capital's investment in the Karachi Electricity Supply Company. Format will include lecture, case discussion, small group discussions and report-backs, in-class debates and role-play exercises.

Assessment:

KEY DATES

By 6am on day of class with case discussion (i.e., classes 2-14), post a 4-5 sentence response to the focal question in Assessment Tool. You must complete 10 of these 13 assignments. There is a strictly enforced limit of 100 words per post.

Friday, February 22 9:00am – Post team paper outlines to team folders in eRoom

Friday, March 1 5:00pm – Post final version of team papers to team paper folder

CONTENT

Regular attendance is required. Students who fail to regularly attend the class will not receive course credit. Assessment for regularly attending students will be based on individual preparation of:

- (1) overall class participation (25%)
- (2) 4-5 sentence quick responses to the **bold italicized** discussion question (30%)
- (3) team paper outline (5%)
- (4) team (\underline{NO} team > 5 members) paper (1 X 40%)

Note that there is NO MIDTERM OR FINAL EXAM.

These four components are discussed in more detail below.

- (1) I expect a high-level of interactive and integrative discussion in every class. You are should carefully prepare for each class, contribute productively as well as listen carefully to others. The emphasis on case analysis and the large class size combine to make it crucial that preparation for and participation in class is of consistently high quality. Please consider the following guidelines for high quality class participation:
 - Relevance: Are your comments clearly related to the case and to the comments of others?
 - Advancement: Does your comment move the class discussion forward? Does it take the discussion farther or deeper than the previous comments?
 - Fact-Based: Have you used specific data from the case, from conceptual or background readings, or from personal experience to support the assertions that you are making?
 - Logical: Is your reasoning consistent and logical? Do you use economic concepts correctly?

To help you I have included discussion questions for each class. We will also employ small group discussions, debates, role play exercises and other activities. I will also cold call students.

I will frequently post news clippings and multimedia that highlight real-time application of course concepts as "pages" on Canvas. You are encouraged to contribute new material or to respond to the material that I post and related questions. I will try to highlight some of the most relevant material and debates in class discussion.

A pattern of absences can result in LT/D/F grades for the course. Frequent but low quality participation and/or distracting behavior (e.g., use of internet or PDAs, side conversations, late entries, early departures, ...) hinders our progress and may also be penalized.

- (2) You should address in no more than 100 words the discussion question(s) in bold italics for a given class. You are free to discuss the questions with your classmates or peers but you must each write up your submissions independently. The post should not emphasize facts from the readings but rather draw upon relevant material in the readings to address the focal (i.e., bold italicized) question. In order to effectively answer that question, you typically need to have
 - i. an understanding of the preferences of the key actors in the case and their intensity;
 - ii. the national or international decisionmaking structure that leads to the translation of these preferences into policy outcomes; and
 - iii. the likely reactions of key market and political actors to any strategic choice. Given the 100 word-limit, however, your answer should focus on the actions that the firm should take to protect or create additional value given the choice highlighted in the question.
- (3) Team paper outlines should highlight the key components of the paper's structure as detailed below in (5). More thorough outlines elicit more helpful feedback. It is insufficient to merely identify a topic in your outline. You need to provide me with meaningful guidance as to the substance of your paper.
- (4) Teams consisting of NO MORE THAN FIVE students (preferably maximizing diversity in background, functional expertise, major, ...) will identify a corporation that faced a dilemma relating to the management of external stakeholder relations (examples below) and draft a 15-20 page paper on the problem faced and strategy pursued by its management. In your team's own words, you will identify and discuss the nature of the conflict between the corporation, the host country governments and its constituents including any relevant multilateral agencies or nongovernmental actors; provide detail on the specific conflict, assess the contending forces faced by the firm, detail the company's strategy (or strategic options) and assess the choices made (or make a recommendation). Papers should be written in a clear and concise manner and integrate material from multiple primary and secondary sources including local press accounts, company documents, local analysis, Text should be double-spaced with 1" margins in a 12-point times new roman font. References, tables, charts and figures do not count towards the page limit but should be used only when they complement the text.

The six broad types of dilemmas typically examined by students are:

- 1) Responding to corruption in national politics
- 2) Mitigating political and regulatory risk in politically salient investments
- 3) Responding to an international trade or investment dispute or the formation/extension of a new free trade agreement
- 4) Responding to an international liquidity or solvency crisis;
- 5) Intellectual property protection, standards or other international legal issues
- 6) Human rights concerns or unilateral / multilateral sanctions; or other global values Scenarios other than those described here may be pursued with the prior consent of the instructor.

Eight basic components should be found in the submitted 15-20 page paper. Page lengths described for each component are suggestions of a normal distribution across sections only and should not be considered binding if your topic merits relatively more/less detail in a given section. However, the complete paper must fall within the page limit and formatting requirements described above.

- 1) An unnumbered title page that identifies all team members and contains an executive summary
- 2) An introduction that identifies a specific company and a specific strategic choice that it faces in a specific policymaking environment that clearly involves a conflict between the corporation and a set of political and/or social actors (1 page);

- 3) An elaboration upon the conflict in a general context but with examples or emphasis upon the particular country and industry setting that you have chosen (2-3 pages);
- 4) A brief background on the company and context that you have chosen highlighting facts relevant to the case discussion (2-3 pages);
- 5) Analyze the strengths and weaknesses of at least two feasible strategic options to address that conflict drawing upon (4-6 pages)
 - i. an understanding of the preferences of the key actors in the case and their intensity;
 - ii. the national or international decisionmaking structure that leads to the translation of these preferences into policy outcomes; and
 - iii. the likely reactions of key market and political actors to any strategic choice.
 - iv. [OPTIONAL] the incorporation of this information into scenarios constructed using the Geopolitical Influence and Strategy Tool (GIST) that compare alternative strategies to influence the current formal or informal policymaking structure and likely policy outcome (online with Figures incorporated in your manuscript);
- 6) Make a recommendation based on that analysis of what the firm/manager should do or have done. Make sure that you help the reader understand the assumptions or weights that led you from your status quo scenario and your analysis of the strengths and weaknesses of options to this particular recommendation. It should be clear to the reader of this section why you did not choose the second best strategic option. (1-2 pages).
- 7) Succinctly summarize the key takeaway of the case (i.e., what lessons can other firms facing similar challenges take from your analysis and recommendations?) (1 page)
- 8) A list of references that includes both secondary (newspaper or magazine) **AND** primary (company newsletter, press release, annual report, company internet site or conversations with individuals familiar with the corporate response to the strategic choice) sources. Please provide enough information so that a reader can easily find the reference.

Examples of exceptional papers will be provided on Canvas.

ABOUT THE INSTRUCTOR

Witold J. Henisz is the Deloitte & Touche Professor of Management in Honor of Russell E. Palmer, former Managing Director at The Wharton School, The University of Pennsylvania. He received his Ph.D. in Business and Public Policy from the Haas School of Business at University of California, Berkeley and previously received a M.A. in International Relations from the Johns Hopkins School of Advanced International Studies.

His research examines the impact of political and social risks on international investment strategy including efforts by multinational corporations to engage in corporate diplomacy to win the hearts and minds of external stakeholders. In an ongoing National Science Foundation funded project he shows that markets value stakeholder engagement twice as much as the net present value of the gold ostensibly controlled by 19 publicly traded gold mining companies. He then assesses the contingencies that influence the choice of which stakeholder these firms should reach out to in order to positively influence valuation as well as how to best develop a cooperative relationship with that stakeholder. This research has been profiled for managers in *Harvard Business Review*, *Brunswick Review*, *Accountability.org*, *Motley Fool*, *TriplePundit*, *Investor Relations Web Report*, *The Public Affairs Council*, *The Penn Gazette* and *Knowledge@Wharton*. His research has been published in top-ranked journals in international business, management, international studies and sociology.

Witold has won multiple teaching awards at the undergraduate and graduate levels for his elective courses that highlight the importance of integrating a deep understanding of political and social risk factors into the design of an organization's global strategy. He has authored teaching cases on the experiences of AES Corporation in the Republic of Georgia, the management of the bankruptcy of Thai Petrochemical Industries and the development of the Rosia Montana gold mine in Romania. He also teaches sessions on Global Policy Risk for multiple open enrollment and custom Executive Education programs at the Wharton School. He led the redesign of the global required course in the Wharton MBA curriculum.

Witold has served as a consultant for Anglo Gold Ashanti, Rio Tinto, Shell Corporation, Maritime Financial Group, The World Bank, The Inter-American Development Bank, The Rand Corporation, The Central Intelligence Agency, Computer Sciences Corporation (CSC), Science Applications International

Corporation (SAIC), Department Of Homeland Security, The Conference Board, Eurasia Group, Hynix Semiconductor, Willkie Farr & Gallagher LLP and Philippine Long Distance Telephone Company (PLDT). He previously worked for The International Monetary Fund. He is currently a principal in the political risk management consultancy PRIMA LLC.

FEEDBACK

I encourage anyone with specific or general questions regarding the course structure, content or discussions to drop by during my office hours or by appointment or to contact me via email or phone. There will be a detailed mid-course evaluation whose results I will present in class. If desired, we can form a quality circle to anonymously gather additional feedback.

Discussion Questions

- 1. Identify a firm that in your opinion mismanaged its political and social environment to the detriment of its financial or operational performance in a foreign market (or identify a class of political problems with which firms have difficulty.)
- 2. What tools from your work experience, other Wharton courses (e.g., financial options, marketing, management, negotiations, legal studies, business and public policy, ...) OR from other college courses (e.g., international relations, development, political science, economics, an area studies course, communications), would you currently use to answer the following questions regarding this firm's experiences:
 - a. What did the firm not understand?
 - b. What should the firm have done differently?
- **3.** Why can't investors and external stakeholders easily identify and implement strategies that make both shareholders and stakeholders better off?

2-3. Introductory Case: Power Trip or Power Play in the Republic of Georgia (T/Th January 15/17)

Readings

Power Trip or Power Play: AES-Telasi (A) (Witold J. Henisz and Bennet A. Zelner)
Power Trip or Power Play: AES-Telasi (B) (Witold J. Henisz and Bennet A. Zelner) [TO BE DISTRIBUTED AFTER FIRST CLASS]

Discussion Questions

- 1. Did AES-Telasi face substantial policy risks? Why?
- 2. Who were the key political and social actors for Michael Scholey in the Georgian environment? Who were his allies? Opponents?
- 3. Who were the key political and social actors for Michael Scholey in the international environment? Who were his allies? Opponents?
- 4. What strategy did AES adopt to deal with this divided political and social environment?
- 5. How should Scholey adapt his strategy in the (A) case? Why?

[FOR 2nd Class]

- 6. What did Scholey and AES-Telasi do differently in the (B) case?
 - a. Do you agree with these changes? Why or why not?
 - b. What reactions did these changes elicit? Were these intended or unintended? Explain.
- 7. What were the strengths and shortcomings of the strategy of Michael Scholey towards the policy risks faced by AES-Telasi in the (B) case?
- **8.** What alternative strategy would you recommend that Ignacio Iribarren (Michael Scholey's successor) implement upon his arrival?

4. Due Diligence: Corruption in Indonesian Mining (Tuesday, January 22)

Readings

Background

Corruption and Development (C. Gray & D. Kaufman, Finance & Development, 3/1/98, pp. 7-10)

Case Discussion

Busang: River of Gold (A) (HBS Case 9-798-002)

Discussion Questions

- 1. How does corruption affect the development of the private sector?
- 2. How is corruption related to the structure of a nation's political institutions?
- 3. How is corruption related to informal norms within a country?
- 4. What are the "rules of the game" in Indonesia's mining sector at the time of the case? Has Bre-X played by the rules?
- 5. Has Bre-X developed relationships in Indonesia? Does it need to? How?
- 6. How should David Walsh respond to Minister Sudjana's announcement? What options are open to him and to Bre-X?

5. Due Diligence: Activist Shareholding in Russia (Thursday, January 24)

Readings

Background

Case

Dyck, Alexander "The Hermitage Fund: Media and Corporate Governance in Russia" *HBS Case* 9-703-010

- 1. What are the various ways in which managers in Russia extract value out of their companies disproportionate to their equity stakes? Which of these methods are peculiar to Russsia?
- 2. What institutions and mechanisms normally constrain such behavior? Why are they absent in Russia?
- 3. What is Browder's strategy? How does it differ from traditional investing? Do you agree with Browder's contention that media attention limits corporate

governance abuses in Russia? Elsewhere? How does the media effect governance?

4. If you were an investor in Hermitage in the summer of 2002, what would you advise Bill Browder to do? Should he refine or change his activist strategy?

6. Integration: Strategy in the Russian Oil Industry (Tuesday, January 29)

Readings

Case Discussion

White Nights and Polar Lights: Investing in the Russian Oil Industry (<u>HBS Case</u>, 9-795-022)

Discussion Questions

- 1. What are some of the relevant characteristics of the oil industry and, in particular, the oil industry in Russia that lead political and regulatory risk to pose such concerns to investors?
- 2. How does political and regulatory risk affect the entry strategy of foreign oil firms in Russia?
- 3. Evaluate the entry strategies of Phibro, Mobil and Conoco. Which one chose wisely? Why? [In-class role play exercise on this question]
- 4. How will the returns from the development of Russian oil likely be distributed in the long term? Why?

7. Integration: The Net Present Value of Sustainability (Thursday, January 31)

Readings

Background

FVTOOL User Guide (a resource for completing assignment. No need to read cover-to-cover)

Case Discussion

Henisz, Witold (2012) "Calculating the Net Present Value of Sustainability Initiatives at Newmont's Ahafo Mine in Ghana"

- 1. Why has the sustainability budget at Newmont and other major mining companies been increasing over the past decade?
- 2. Using what criteria (i.e., net present value or broader) should the decision be made as to what sustainability initiatives merit funding?
- 3. Which of the four initiatives should Newmont fund?
 - a. What are the critical assumptions that go into this calculation that you feel are sufficiently justified or established?
 - b. that you feel require additional analysis or a stronger evidentiary base to justify?
- 4. What do you think the biggest benefit for an organization would be to the adoption and use of the FVTOOL? What are the most important inputs to realizing this potential gain?
